*How we perceive bitterness in a beer is profoundly affected by the type of beer in question, so there is a big difference between absolute bitterness (IBU) and the bitterness we perceive. IBU values are a good measure for some beer styles, but are misleading for others. I express my estimation of how the bitterness in these beers is experienced by the imbiber, in what I call Perceived Bitterness Units (PBU). For more information, stop reading geeky beer news and crack one open to see for yourself.

-JOE KATCHEVER, PEARL STREET BREWERY BREWMASER
